Professional Experience

Freelance web developer & consultant, WA, September 2015 (current)

Creating websites from the ground up! Domain registration and hosting setup. CMS install, including Drupal and Wordpress. Package installations using NodePM and Git. Running common Grunt tasks. Creating custom Bootstrap subthemes and adding page content. Adding page functionality with jQuery.

***Decimal Software**, Nedlands, WA, June-September 2015 (3 months)*

Web developer – 3 months - Retrenched

Working with online financial advice, my brief time at Decimal was spent developing new features and on-boarding screens using Angular JS, PHP, and MS SQL. I updated existing functionality and found solutions to known issues.

***Lotterywest**, Osborne Park, WA, November 2012 –June 2015 (2.5 years)*

Web developer & analyst – 3 month initial contract

Maintain and update both the corporate intranet and internet sites. Provide web support to business users.

- Key developer for the Mobile Access project (responsive design)
  - Implemented responsive design techniques
  - Responsible for JS debugging
  - Championed SASS integration
  - Provided guidance for team members (AJAX, HTML5, CSS3,SASS)

- Redeveloped out-dated pages utilizing the latest web technologies
- Responsible for updating the Approved Grants list and Retailer Locater map
- Created numerous intranet ads for various departments, using Photoshop
- Developed and tested EDM's, using Lyris

The Minke Whale Project, Townsville, QLD, 2011-2012

Web developer – 9 months (MIT Project)
Designed and developed new website as part of my Master's degree, managing all client liaisons, providing support, training and delivering to schedule.

- Developed secure whale sighting database and implemented a sighting map
- Management of project timeline and deliverables
- Provided cross-browser functionality using strict HTML5, PHP, CSS, XML and jQuery
- Code development, testing and revision tracking

Chevron Australia, Perth, WA, 2009

Web developer – 8 months (Temp contract)
Collaborated with managers across multiple departments to successfully migrate corporate content to SharePoint 2007, and developed related training resources.

- Audit of previous system
- Migrated content to SharePoint CMS (front-end)
- Created interactive training and awareness tutorials
- Developed project timelines

Thales Australia, Nedlands, WA, 2008

Graduate software engineer – 6 months (Temp contract)
Reporting to the senior software engineer I performed code reviews and ran tests of confidential Australian Defence Force applications using C++ and Java.

- Regression testing and bug fixing
- Updated HMID
- Verified safety critical functions
